Class Highlights

PA State Safety Inspection Certificate

This program includes classroom preparation and testing to become a licensed PA State Inspection Mechanic.
(See Page 7 for details)

Working in the Cloud

Find out the best way to put the Cloud to use for sharing and storing information, increasing efficiencies and even cutting your software costs.
(See page 12 for details)

Stick/MIG/TIG Welding – Beginner & Intermediate (HUB)

We will once again be offering this class at the HUB. Class size is limited, so enroll early.
(See page 17 for details)

Sign language

In this beginners level class you will learn the basics from the alphabet and numbers to simple words and sentence creation.
(See page 17 for details)

Mon Valley Works ICD

The Mon Valley Works Institute for Career Development (ICD) is a benefit negotiated by the United Steelworkers collective bargaining agreement exclusively for union employees of U.S. Steel. ICD offers personal development and educational opportunities for learning in a confidential, convenient and comfortable environment. U.S. Steel contributes \$0.15 per hour worked by USW employees to fund the program.

Enrollment Basics:

- New hires are eligible for all classes
- Enrollments are on a first-come first-served basis
- Retirees are eligible for most classes (see *course descriptions*)
- Spouses may attend most classes when space is available (see *course descriptions*)
- Unless noted classes are held at the Mon Valley Works Training HUB

Tuition Assistance:

All USW members employed by U.S. Steel are eligible to receive up to \$1,800.00 annually in tuition assistance, to an accredited institution.

For more information about this National program, please visit the national website at www.icdlearning.org

Customized Classes:

Our classes are designed with the unique needs of a Steelworker in mind: making learning comfortable and accessible; offering educational opportunities designed to meet special scheduling needs; convenient class locations with scheduling options; and a non-threatening learning environment.

Another important aspect of the program is learning confidentiality. Only the Steelworker and the Career Development staff know whether the Steelworker is there to brush up on basic skills or complete a college-level course and grades are not part of the program design. Online computer aided instruction; traditional classroom settings; small group sessions; one-on-one tutoring; and hands on learning are learning options available.

Perhaps there is something you have always wanted to learn but may not have ever been able to take such a class. Don't see a course or skill that interests you? If you can find 5 interested people and an instructor is available, a course can be scheduled right away!

Pre-Learner Maintenance Training Program

Per our 2008 Labor agreement and in an effort to facilitate testing to enter the Mechanical or Electrical maintenance training program, U.S. Steel and the United Steelworkers have chosen an online standardized Pre-Learner Maintenance Training Program to provide employees with the opportunity to acquire the necessary skills and knowledge to test at a higher level when entering into the Maintenance Training Program. The Program will be administered through the local ICD Program located at the Mon Valley Training Hub. Contact a coordinator for additional details.

Entrance Requirements

Students must...

- be an active non-maintenance Steelworker
- register with an ICD Coordinator for the Pre-Learner Program by calling **412-460-0390**
- have a valid Email address
- must take the classes on their own time

Students are advised that course completion does not guarantee them a Maintenance Technician position. All additional requirements to become a Learner or Maintenance Technician must still be met.

Retirees and Maintenance Technician's are not eligible for this program

Completion Requirements

- A passing score of (85%)
- Completion of all required classes, labs and tests
- All classes must be taken in the order they are given and all coursework must be completed.
- Certificate of completion from ICD and course transcript and performance will be provided to the Company upon "graduation".

All class work can be completed online at the student's convenience.

Any student who does not have access to a computer should contact the Career Development Center to make arrangements to use the Center computers.

If a student needs training in computer basics, it can be provided through Career Development.

Looking forward as we bid a fond farewell

The ICD would like to recognize our current Coordinator, Mike Ondrish for his 13 years of service and commitment to our program, 32 years of employment in mechanical maintenance at Clairton Works and 6 years as an elected official for Local 1557. Mike has decided to retire and will be leaving his position at the end of August. He would like to take this opportunity to thank the many friends he has acquired during the years associated with the United Steelworkers, US Steel and the ICD. Mike plans to travel and spend time with his wife and children. The ICD wishes Mike a long, happy and healthy retirement.

The ICD would also like to welcome our new Coordinator, Tamara Lefcowitz who joined us in June 2015 after 6 years of employment with the SEIU (Service Employees International Union). Tamara is excited to use her experience working in the labor movement to develop additional opportunities for members eligible to utilize the ICD benefit.
